# 99 YEARS OF QUANTUM MECHANICS

WEBINAR | 12 MAY 2021 | 10:00 AM BST

**1922: the Danish physicist Niels Bohr won the Nobel Prize** for his services in the investigation of the structure of atoms and of the radiation emanating from them.

He may not have known it at the time, but Niels Bohr's foundational work established a long Danish tradition of research into quantum mechanics. **Since then, Denmark has developed into one of the strongest hubs for quantum research in the world.**

99 years on from Niels Bohr and his groundbreaking work a strong cluster of Danish commercial quantum companies have emerged. At this webinar organised by the **Danish Embassy in the UK**, we will give you a first introduction to a selection of these in a showcase moderated by **Anke Lohmann, founder of Anchored In Ltd**

## YOU WILL MEET:

CRYPTOMATHIC

KPMG P/S

SPARROWQUANTUM

QDEVIL

TECHNICAL UNIVERSITY OF  
DENMARK (DTU)

MOLECULAR QUANTUM  
SOLUTIONS APS

NIELS BOHR INSTITUTTET

TRIFORK
